Eye Auto Refractometer Machine - Kallakurichi

Name Of The Project	: Strengthening of eye testing, purchase of auto refractometer for eye testing in Kallakkurichi PHC
District	: Villupuram
Block	: Kallakurichi
Date Of A.S	: 11.05.2015
Project Cost	: 3.99 Lakhs
Implementing Agency	: DD Health, Kallakurichi
Current Status Of Project	: Completed
Utilisation Certificate	: Submitted

Objectives of Project:

- To screen large number of people in special vision camps in schools, villages
- To screen refractory errors with more accuracy
- To prevent loss of vision due to refractory errors in children
- To prevent loss of vision due to cataract in elderly people

Before the Project:

There is no availability of refractometer machines to perform vision study in large number of people on a single day in special camps which need more human resources. Hence these machines are being got from the nearby Govt. Hospitals on the day of procedures which needs transportation. Sometimes the machines are not available due to various reasons.

After the Project:

Now since there is availability of refractometer machine, antenatal scan are being carried out on any convenient days and whenever is needed.

Performance:

Since from the purchase of the Ultrasound machine from 2016, 3086 adults and 15034 school children in KKT have been screened by this Primary Health Centre.
